# Hi, I'm Kalkidan Gashaw

Frontend Developer

This is my official portfolio website to showcase all my works related to web development.

My Works   Let's talk

So, Who am I?

I'm an aspiring web developer with a passion for creating engaging and user-friendly websites. I started my journey in web development a year ago, exploring various technologies and frameworks. I enjoy problem-solving and constantly seek to improve my skills.

In addition to coding, I enjoy reading psychology books and thinking about human behavior. I believe that understanding people is important for making great websites. I'm excited about the future of technology and hope to work on projects that have a positive impact.

Some of my projects

Login web page

This project showcases a modern login interface designed using the Flexbox layout model. The primary goal was to create a responsive and user-friendly login page that adapts seamlessly to different screen sizes.
